

# STAT157/260 Project Proposal

April 5, 2023

**due Wednesday, April 12th at 11:59pm**

For your project proposal, please include the following information in a document about a half-page long, and no longer than 1 page:

- The names of your group members.
- The option you are choosing.
- For the first option, **in-depth long term forecast**: A brief description of the forecasting question you are addressing. You do not need to have precise resolution criteria yet, but you should convey some background information about the forecast, and why you are interested in it. Additionally describe the steps you will take to investigate the question.
- For the second option, **research-style project**: A brief description of your proposal, which should include a clear statement of the question you will investigate, and an outline of the steps you plan to take.

Only one member of each group needs to submit the proposal to Gradescope. Please create a group submission on the “Project Proposal” Gradescope assignment including all your group members.
